

THE WHOLE-*number* CHECKLIST

Every cost of an interior from Foshan, and how to compare it with your local quote.

Most people compare the price of a sofa. The number that matters is the whole interior: design, products, inspection, freight and import costs, delivered to your door. This checklist lists every line we quote up front, so you can put it next to a local quote and compare like with like.

01 DESIGN

Concept and moodboard, 3D and a VR walk-through of every room, technical drawings and schedules, lighting and electrical plan. Two weeks for a whole home, where a local studio usually needs two months. The design fee is credited back when you order.

02

PRODUCTS

Everything the design calls for, priced at factory level in Foshan: furniture, lighting, kitchens and wardrobes, bathrooms, stone and tile, doors and windows, flooring, textiles and décor, and building materials. Standard items and fully custom pieces.

03

INSPECTION AND PACKING

Every piece is checked by our own technicians against the drawings, the approved finish and the hardware, photographed and filmed, then export-packed and labelled by room.

04

CONSOLIDATION

Products from every factory come to our own 10 000 m² distribution centre in Foshan and leave together: one manifest, one customs clearance, one delivery.

05

SEA FREIGHT

From Foshan to your port, usually four to six weeks depending on the destination.

06

INSURANCE

Cover for the shipment from our distribution centre to your door.

07

IMPORT DUTY AND VAT

These depend on your country. We quote them up front and confirm them for your destination before you order.

08

DELIVERY AND INSTALLATION

Customs and freight handled by us. Installation drawings and remote guidance travel with the container, so your local team knows where every crate goes.

HOW TO READ A *local* QUOTE AGAINST OURS

-
- Does it include design, or only the furniture?
 - Does it cover every room, or a few pieces?
 - Are the materials the same grade: the same stone, the same veneer, the same hardware?
 - Are delivery and installation included, and how many separate deliveries will there be?
 - How many suppliers will you be coordinating yourself?
 - How long from the first meeting to a finished interior?
-

Our answer to the last one: most whole-home projects land in four to five months from the first call, and the whole interior usually costs around 30% of what local suppliers charge for the same rooms.

WHAT TO SEND US

A floor plan or a few photos of the space, your country and a rough timeline. You get a first direction and a budget range within two working days.
